Vision

To make Kenyan horticulture the global choice.

Mission

To develop, unite and promote the Kenyan horticultural industry in the global market with due regard to safety, good agricultural practices, social, ethical and environmental responsibilities.

What We Do

Advocacy & Lobbying
FPEAK influences and advocates for a conducive business environment for the horticulture industry in Kenya. This is done through public and private partnerships at both local and international level.

Capacity Building
FPEAK partners with development agencies and other stakeholders to enhance growers, exporters and service providers capacity along the value chain.

Marketing
FPEAK links its growers and members to national and international markets. This is made possible through creating direct market linkages, supporting members to attend national and international trade fairs and providing timely market information.

Standards & Compliance
FPEAK with other stakeholders supports members to comply with national and international market requirements and conventions (official and private standards). FPEAK collaborates with standard owners and implementers to bring compliance closer to Kenyan producers through participation in interpretation and harmonization of standards.

Who We Are

Fresh Produce Exporters Association of Kenya (FPEAK) is the premier trade Association representing growers, exporters and service providers in the horticulture industry.

FPEAK represents and supports its members to address the challenges facing the horticultural industry. In this regard, FPEAK maintains constant consultation with the Government and other stakeholders in order to drum up enough support for the horticultural industry in Kenya.
